Boyd Promoted to Major

HANOVER, N.H.—Captain Raymond Boyd, a research and development coordinator, stationed at the U.S. Army Engineer Research and Development Center's Cold Regions Research and Engineering Laboratory (CRREL) in Hanover, N.H., was recently promoted to the rank of Major.

Stationed at CRREL since July 1998, Boyd's most recent deployment was a five-month tour to Kosovo as the Operations Officer for the Base Camp Coordinating Agency, Camp Bondsteel.

Boyd recently participated in an engineer summit to Wiesbaden, Germany, in an effort to outline new doctrine regarding civilian Department of Defense personnel within the Corps of Engineers for contingency operations similar to those procedures used for Kosovo operations. This new doctrine includes a wide variety of elements to include – transportation, supplies, those items needed for life support, and other essential pieces of equipment that would be necessary to maintain civilians during contingency operations.

Boyd, a native of Leavenworth, Kan., earned a bachelor of science degree in construction engineering from Pittsburg State University, Pittsburg, Kan. And in 1990 he was commissioned as an officer in the U.S. Army.
